Forensic Science International, 51 (1991) 307–310
Elsevier Scientific Publishers Ireland Ltd.

SUBJECT INDEX
Volume 51 (1991)

absorption standard, microspectrophotometry, 263
age estimation by tooth, scoring system, image analysis, logarithmic data transformation, third molar, 281
amplification, polymerase chain reaction (PCR), HLA DQα locus, restriction mapping, 147
anomalous pulmonary venous drainage, sudden death, infancy, 197
Apo B 3' length polymorphism, DNA, polymerase chain reaction, population data, 173
autopsy, cerebral aneurysm, cerebral angiography, methods, postoperative complications, malpractice, 13

BASIC algorithms, DNA profiles, single-locus probes, gene frequencies, 273
benzodiazepines, gas chromatography/Fourier transform infrared spectrometry, benzophenones, vapor phase spectra, condensed phase spectra, 179
benzophenones, gas chromatography/Fourier transform infrared spectrometry, benzodiazepines, vapor phase spectra, condensed phase spectra, 179
blood, codeine, ethylmorphine, morphine, method, 105
blood stains, photoluminescence, semen stains, 289
brighteners, microspectrofluorimetry, single fibres, dyes, colour measurements, 221
brighteners, microspectrofluorimetry, single fibres, dyes, fluorescence decay, 239
brighteners, microspectrofluorimetry, single fibres, dyes, emission spectra, 203
buflomedil, fatal overdose, extrelut extraction, gas chromatography-mass spectrometry, 125

capillary gas chromatography, pyrethroid, pyrethrin, Sep-Pak C_{18} cartridges, solid phase extraction, 89
carbon monoxide, suicide, Scotland, hanging, motor vehicle exhaust fumes, 79
catecholamine, vital reaction, serotonin, metabolites, incised wound, high-performance liquid chromatography, 51
cause-of-death, medical examiner system, medicolegal inquest, standardized mortality ratios (SMRs), manner-of-death, heart failure, 35
cerebral aneurysm, cerebral angiography, methods, postoperative complications, autopsy, malpractice, 13
cerebral angiography, cerebral aneurysm, methods, postoperative complications, autopsy, malpractice, 13
codeine, ethylmorphine, morphine, blood, method, 105
colour measurements, microspectrofluorimetry, single fibres, dyes, brighteners, 221
condensed phase spectra, gas chromatography/Fourier transform infrared spectrometry, benzodiazepines, benzophenones, vapor phase spectra, 179
constant T/DHT ratio, semen androgens, matching semen stains, semen testosterone and dihydrotestosterone, semen fingerprint, 1
crime, event-related potential, lie detection, simulated criminal investigation, 95
criminalistics, glass, windows, fragmentation, 251

dextropropoxyphene, ethanol, paracetamol, postmortem, toxicology, 189

direct inlet mass spectrometry, quaternary ammonium compounds, mass chromatography, 131
DNA, polymerase chain reaction, Apo B 3' length polymorphism, population data, 173
DNA profiles, single-locus probes, gene frequencies, BASIC algorithms, 273
dyes, microspectrofluorimetry, single fibres, brighteners, fluorescence decay, 239
dyes, microspectrofluorimetry, single fibres, brighteners, emission spectra, 203
dyes, microspectrofluorimetry, single fibres, brighteners, colour measurements, 221

emission spectra, microspectrofluorimetry, single fibres, dyes, brighteners, 203
erythrocytes, potassium, postmortem interval, 111

ethanol, paracetamol, dextropropoxyphene, postmortem, toxicology, 189
ethylmorphine, codeine, morphine, blood, method, 105
event-related potential, lie detection, crime, simulated criminal investigation, 95
extrelut extraction, buflomedil, fatal overdose, gas chromatography-mass spectrometry, 125

fatal overdose, buflomedil, extrelut extraction, gas chromatography-mass spectrometry, 125
fingerprints, fluorescence, spectra, microspectrophotometry, monochromator, laser, marks, 297
fire victims, forensic science, polymerase chain reaction, identity testing, post-mortem, 23
fluorescence, fingerprints, spectra, microspectrophotometry, monochromator, laser, marks, 297
fluorescence decay, microspectrofluorimetry, single fibres, dyes, brighteners, 239
fluorescence detection, ofloxacin, hair analysis, high performance liquid chromatography (HPLC), 65
fluorescent microspectrophotometry, skin, wound, histamine, mast cell, 163
forensic science, polymerase chain reaction, fire victims, identity testing, post-mortem, 23
fragmentation, criminalistics, glass, windows, 251

gas chromatography-mass spectrometry, buflomedil, fatal overdose, extrelut extraction, 125
gas chromatography/Fourier transform infrared spectrometry, benzodiazepines, benzophenones, vapor phase spectra, condensed phase spectra, 179
gene frequencies, DNA profiles, single-locus probes, BASIC algorithms, 273
glass, criminalistics, windows, fragmentation, 251

hair analysis, ofloxacin, high performance liquid chromatography (HPLC), fluorescence detection, 65
hanging, suicide, Scotland, carbon monoxide, motor vehicle exhaust fumes, 79
heart failure, medical examiner system, medicolegal inquest, standardized mortality ratios (SMRs), cause-of-death, manner-of-death, 35
high-performance liquid chromatography, vital reaction, catecholamine, serotonin, metabolites, incised wound, 51
high performance liquid chromatography (HPLC), ofloxacin, hair analysis, fluorescence detection, 65
histamine, skin, wound, fluorescent microspectrophotometry, mast cell, 163
HLA DQα locus, polymerase chain reaction (PCR), restriction mapping, amplification, 147
hypoxanthine, time of death determination, vitreous humor, potassium, 139

identity testing, forensic science, polymerase chain reaction, fire victims, post-mortem, 23
image analysis, age estimation by tooth, scoring system, logarithmic data transformation, third molar, 281
incised wound, vital reaction, catecholamine, serotonin, metabolites, high-performance liquid chromatography, 51
infancy, anomalous pulmonary venous drainage, sudden death, 197

laser, fingerprints, fluorescence, spectra, microspectrophotometry, monochromator, marks, 297
lie detection, event-related potential, crime, simulated criminal investigation, 95
logarithmic data transformation, age estimation by tooth, scoring system, image analysis, third molar, 281

malpractice, cerebral aneurysm, cerebral angiography, methods, postoperative complications, autopsy, 13
manner-of-death, medical examiner system, medicolegal inquest, standardized mortality ratios (SMRs), cause-of-death, heart failure, 35
marks, fingerprints, fluorescence, spectra, microspectrophotometry, monochromator, laser, 297
mass chromatography, quaternary ammonium compounds, direct inlet mass spectrometry, 131
mast cell, skin, wound, fluorescent microspectrophotometry, histamine, 163
matching semen stains, semen androgens, constant T/DHT ratio, semen testosterone and dihydrotestosterone, semen fingerprint, 1
medical examiner system, medicolegal inquest, standardized mortality ratios (SMRs), cause-of-death, manner-of-death, heart failure, 35

medicolegal inquest, medical examiner system, standardized mortality ratios (SMRs), cause-of-death, manner-of-death, heart failure, 35
metabolites, vital reaction, catecholamine, serotonin, incised wound, high-performance liquid chromatography, 51
method, codeine, ethylmorphine, morphine, blood, 105
methods, cerebral aneurysm, cerebral angiography, postoperative complications, autopsy, malpractice, 13
microspectrofluorimetry, single fibres, dyes, brighteners, fluorescence decay, 239
microspectrofluorimetry, single fibres, dyes, brighteners, emission spectra, 203
microspectrofluorimetry, single fibres, dyes, brighteners, colour measurements, 221
microspectrophotometry, absorption standard, 263
microspectrophotometry, fingerprints, fluorescence, spectra, monochromator, laser, marks, 297
monochromator, fingerprints, fluorescence, spectra, microspectrophotometry, laser, marks, 297
morphine, codeine, ethylmorphine, blood, method, 105
motor vehicle exhaust fumes, suicide, Scotland, hanging, carbon monoxide, 79

ofloxacin, hair analysis, high performance liquid chromatography (HPLC), fluorescence detection, 65

paracetamol, ethanol, dextropropoxyphene, postmortem, toxicology, 189
photoluminescence, semen stains, blood stains, 289
polymerase chain reaction, DNA, Apo B 3' length polymorphism, population data, 173
polymerase chain reaction, forensic science, fire victims, identity testing, post-mortem, 23
polymerase chain reaction (PCR), HLA DQα locus, restriction mapping, amplification, 147
population data, DNA, polymerase chain reaction, Apo B 3' length polymorphism, 173
post-mortem, forensic science, polymerase chain reaction, fire victims, identity testing, 23
postmortem, ethanol, paracetamol, dextropropoxyphene, toxicology, 189
postmortem interval, potassium, erythrocytes, 111
postoperative complications, cerebral aneurysm, cerebral angiography, methods, autopsy, malpractice, 13
potassium, erythrocytes, postmortem interval, 111
potassium, time of death determination, vitreous humor, hypoxanthine, 139
pyrethrin, pyrethroid, Sep-Pak C_{18} cartridges, solid phase extraction, capillary gas chromatography, 89
pyrethroid, pyrethrin, Sep-Pak C_{18} cartridges, solid phase extraction, capillary gas chromatography, 89

quaternary ammonium compounds, direct inlet mass spectrometry, mass chromatography, 131

restriction mapping, polymerase chain reaction (PCR), HLA DQα locus, amplification, 147

scoring system, age estimation by tooth, image analysis, logarithmic data transformation, third molar, 281
Scotland, suicide, hanging, carbon monoxide, motor vehicle exhaust fumes, 79
semen androgens, constant T/DHT ratio, matching semen stains, semen testosterone and dihydrotestosterone, semen fingerprint, 1
semen fingerprint, semen androgens, constant T/DHT ratio, matching semen stains, semen testosterone and dihydrotestosterone, 1
semen stains, photoluminescence, blood stains, 289
Sep-Pak C_{18} cartridges, pyrethroid, pyrethrin, solid phase extraction, capillary gas chromatography, 89
serotonin, vital reaction, catecholamine, metabolites, incised wound, high-performance liquid chromatography, 51
simulated criminal investigation, event-related potential, lie detection, crime, 95
single-locus probes, DNA profiles, gene frequencies, BASIC algorithms, 273
single fibres, microspectrofluorimetry, dyes, brighteners, fluorescence decay, 239
single fibres, microspectrofluorimetry, dyes, brighteners, colour measurements, 221
single fibres, microspectrofluorimetry, dyes, brighteners, emission spectra, 203

skin, wound, fluorescent microspectrophotometry, histamine, mast cell, 163
solid phase extraction, pyrethroid, pyrethrin, Sep-Pak C_{18} cartridges, capillary gas chromatography, 89
spectra, fingerprints, fluorescence, microspectrophotometry, monochromator, laser, marks, 297
standardized mortality ratios (SMRs), medical examiner system, medicolegal inquest, cause-of-death, manner-of-death, heart failure, 35
sudden death, anomalous pulmonary venous drainage, infancy, 197
suicide, Scotland, hanging, carbon monoxide, motor vehicle exhaust fumes, 79

third molar, age estimation by tooth, scoring system, image analysis, logarithmic data transformation, 281
time of death determination, vitreous humor, hypoxanthine, potassium, 139
toxicology, ethanol, paracetamol, dextropropoxyphene, postmortem, 189

vapor phase spectra, gas chromatography/Fourier transform infrared spectrometry, benzodiazepines, benzophenones, condensed phase spectra, 179
vital reaction, catecholamine, serotonin, metabolites, incised wound, high-performance liquid chromatography, 51
vitreous humor, time of death determination, hypoxanthine, potassium, 139

windows, criminalistics, glass, fragmentation, 251
wound, skin, fluorescent microspectrophotometry, histamine, mast cell, 163
